

Volvo S60
Accessories Listing

Trailer Hitch

\$906 installed

Tired of hitting your legs when loading the car? This removable tow hitch for the S60 has been specially adapted for the North American market and is quite easy to handle.

The tow bar consists of three main components: crossmember, ball holder and a ball with a diameter of 2". The car has provision in the bodywork for installation.

The ball mount is very simple to use. If you want to remove it, to make space for another of our towbar mounted accessories, simply remove a spring pin. If you choose not to have the ball or one of our other accessories installed, we have a neat and functional protective cover, to cover the hole in the crossmember.

Technical data

Max. towing capacity:	1500 kg/3300 lb
Tow ball diameter:	2" Class 2
Recommended ball load:	75 kg/165 lb

Hitch Mounted Ski Rack

\$476 installed

A functional carrier designed for up to 6 pairs of skis or 4 snowboards. The ski carrier mounts easily to an existing square profile hitch. A practical and simple method for transporting your skis/snowboards while providing a convenient load height.

Facts and Advantages

- Made of black-painted steel with black rubber straps that are stretched across the skis.
- A lock is included to lock your skiing equipment to the ski carrier.
- The most easily accessible and convenient way to haul your skis to the slopes.

Hitch Mounted Bike Rack

\$389 installed

An easy-to-use bike carrier for four bicycles. The bike holder mounts easily to an existing square profile hitch. The ride height of the holder allows the quickest and most convenient loading and unloading of your bikes.

The bicycles are fitted into rubber cradles on the black painted steel arm and strapped in using polypropylene straps. The bike holder also includes a lock to keep you bikes secure at all times.

Roof Mounted Load Bars

\$167

A stylish load carrier for the S60 for simple attachment of the load accessories you require for transporting roof loads. The load bars will easily accept many of Volvo's roof top accessories including bike racks, ski racks and roof top boxes among others.

Specially designed load carriers which consist of two heavy-duty, plastic covered, galvanized steel profiles with full plastic covered feet. The feet align in the prepared mountings in the roof moulding and the mounting mechanism is well protected.

Installation is quick and easy and the load carriers are securely fastened to the car.

Technical data:

Max. load capacity:

100 kg

Accessory weight:

6 kg

Six Pair Sliding Ski Rack

\$160 installed

This sliding ski rack holds up to six pairs of skis or up to four snowboards, depending on the type of binding and width of skis/boards. The ski holder slides out from the vehicle to allow for easy loading and unloading. It has large push button latch, which allows easy opening even when wearing bulky winter gloves. The ski rack locks securely to keep your skis and snowboards safe. Attaches to existing load bars. A must have for your next ski trip.

Snowboard Carrier

\$184 installed

A very easily loaded carrier for 2 snowboards, this carrier adjusts to four different positions to allow for different sized boards. The snowboard carrier takes up little space on the roof, which means that other accessories or extra snowboard/ski holders can be mounted on the load bars. It locks securely to keep your snowboards safe. Attaches to existing load bars. Get it for your next boarding excursion.

Mountaineer 2 Roof Box

\$577 installed

Designed with durable, lightweight, ABS plastic, the Mountaineer 2 Cargo Box is ideal for the large family or for anyone taking their friends skiing for the weekend. Easily transports luggage, camping gear, golf clubs or anything else that clutters the car. The Mountaineer 2 provides safe storage while protecting your belongings from the elements. Attaches to existing load bars.

- Dual side opening allowing for easy access to cargo from either side of the car.
- Easy opening and closing with Volvo central locking. One key system.
- Oversized capacity provides 17 cubic feet of storage.
- Holds between 6-8 pairs of skis, boots and poles.
- Constructed of tough impact resistant UV protected ABS plastic.
- Smooth, aerodynamic design for minimal wind noise.
- Easily attaches to Load/Cross bars with New Quick Snap hardware for easy on/off.

Product facts

Volume:	17 cubic feet
Weight:	40 lbs
Dimensions:	91"L x 30"W x 16"H

Euro Weekender Roof Box

\$445 installed

A very practical and easy to use cargo box for leisure activities for example and it fits all Volvo load carriers.

The Euro Weekender Cargo Box is manufactured from vacuum-formed ABS plastic. As a result, they are incredibly light. This gives the advantage of increased load capacity, although they are not as rigid as heavy fiberglass-reinforced boxes. They are, however, extremely durable and satisfy all requirements.

Facts and Advantages

- Can be opened from either side; "dual-opening" system
- Securely lockable to keep your belongings safe.
- Equipped with two luggage retention straps
- Aerodynamic design
- Volvo badge on the long sides
- Fitted to Volvo load carriers using U-shaped bolts

Technical data

Length:	1750 mm (68.9 in) (external)
Width:	820 mm (32.3 in) (external)
Height:	365 mm (external)
Volume:	370 l
Weight:	15 kg (33.1 lbs)
Maximum load:	50 kg (110.2 lbs)

Upright Bike Rack

\$144 installed

A bike carrier for anyone who appreciates a combination of elegant design and simple handling. Made of aluminum and structured around a solid rail and robust rod.

The bicycle rack is manufactured completely of aluminum with self-adjusting quick-fit wheel holders and frame holder with lock knob. Attaches to existing load bars. One carrier needed for each bike.

All locking and adjustment is performed at a comfortable car roof height and the bicycles are tensioned securely without damaging paintwork thanks to the rubber coated tensioning arm. Your bike goes on and comes off of carrier easily so you can get on the trail quickly.

Fork Mounted Bike Rack

\$166 installed

Wheel Holder

\$60 installed

Fork mounting is a very stable way of carrying bicycles, with no risk of swaying or rattling. The bicycle rack has a forward holder with a quick-fit mount, making it easy to secure your bicycles. Two handles makes the quick-fit mount quick to adjust for any type of fork. Attaches to existing cross bars. At least two holders can be installed. More can be installed depending on the type of car and bicycle.

The wheel can be stored in the cargo area, or on the available wheel holder. The wheel holder also mounts to the load bars and frees up cargo space in the vehicle.

Facts and Advantages

- A quick-fit mounting to which the front fork is secured and locked with two simple operations
- Adjustable, quick-fit wheel holders for a variety of wheel dimensions
- Dual locking function which locks the cycle onto both the rail and the load carrier. The holder is secured to the car even when not transporting a bicycle.

Moonroof Wind Deflector

\$144 installed

Volvo's Moon Roof Wind Deflector greatly reduces wind noise and air turbulence within the vehicle by redirecting the air flow over the moon roof opening. It also prevents rain from entering the cabin while driving.

Mudflaps

\$112 front / \$101 rear

The Volvo mudflaps are designed to fit the car's wheel housing, and add significantly to the car's styling. They also effectively protect the sides of the car from wheel spray. Volvo mudflaps are an easy way to help keep your Volvo clean.

Sports Styling Body Kit

\$3279 installed

An exclusive body kit with an expressive design which stresses the car's sporty appearance in an elegant way. The kit replaces existing components and so becomes an integrated unit in the car's body design. The kit consists of front and rear spoilers and side skirts and cannot be combined with mudflaps.

Rear Spoiler

\$425 installed

A rear spoiler designed to complement the shape of the car which elegantly increases the sporty impression.

Fog Lamps

\$346 installed

Volvo's fog lamp kits are beautifully fitted, low-level light which improves vision in haze, fog and snowfall and gives the car a tougher appearance. Computer designed reflector surfaces provide optimum lighting performance. The fog lamps add greatly to the sporty appearance and visibility of your S60.

Cargo Tray

\$76

A practical cargo compartment mat molded in plastic for everyone with an active outdoor life. Thanks to the raised edges dirt and water are prevented from leaking out into the cargo compartment. The mat is coated with a layer of high friction plastic to prevent the load from sliding around. The fit is perfect, and the mat is easy to install, remove and clean.

Rubber Mats

\$102

A complete floor mat in rigid natural rubber with surrounding high-raised edges. There is also a raised edge around the fitting holes which effectively prevents dirt and water penetrating underneath.

Tunnel Mat

\$18

A protective mat that lays over the tunnel in the rear seat which protects the car's original carpets from dirt and wear. Especially suitable when carrying three passengers on the rear seat.

Side Net Pocket

\$77 installed per side

An elasticized net pocket for easy storage and fastening of bottles, carrier bags, small packages and similar.

Trunk Floor Net

\$99 installed

A practical fabric net which prevents loads from moving about the cargo compartment. Manufactured in elastic material making it easy to stow luggage underneath it. Color coordinated with the interior.

Rear Door Sun Shades

\$205 installed

The sun blind is integrated into an aluminum cassette which is installed in the lower edge of the window above the door panel. The sun blind is hooked into place on the window and goes up and down with the window.

Rear Window Sun Shade

\$212 installed

The attractive and discreet Volvo blind is housed in an aluminum cassette which is color coordinated with the car's interior equipment and effectively protects against heat and sunlight.

Sunglass Holder

\$44 installed

A very practical and functional sunglasses holder with cover and rubber inlay for optimum storage. The sunglasses holder can be easily fitted in any of the outer positions by the door grab handles. The holder is easy to use with one hand due to an oil damped spring.

Booster Seat & Backrest

\$164

Give your child a safe and comfortable journey. Used together with normal seat belt and provides the belt with correct alignment to the child's body for optimum grip in the event of a collision. The child will also sit higher up and have a better view. Seat is intended for children between 3 and 10 years, weight 15-36 kg (33-80 lb.) The angle of the backrest can be adjusted to give your child a more comfortable sleeping position. It can be set to five heights and two different backrest angles, increasing the protection for the child's neck and back.

Facts and Advantages

- Crash-tested and approved according to standards ECE R44-03 and FMVSS 213
- The design of the upholstery matches the child seat
- Washable upholstery
- Fits all cars with 3-point seat belts
- The backrest provides extra comfort and protection in the event of a collision from the rear
- The backrest is adjustable; there are 5 different heights and 2 backrest angles.

Wood Trim Kit

\$464 installed

Customizing your Volvo has never been easier, thanks to the Volvo Wood Trim Kit. The additional trim kit is the perfect complement to the factory installed wood that's already in the vehicle. Made of premium synthetic materials, these kits are very durable and match the factory finish of your vehicle. Easily installed, the wood trim kit will bring an added sense of style to the vehicle interior.

The wood trim kit consists of extremely accurate, three dimensional dash, console and door panel surfaces. These precision made pieces make the difference when it comes to delivering the superior fit that Volvo owners expect. The trim panels have been subjected to rigorous testing, including accelerated exposure, flammability, impact, abrasion and chemical resistance.

Homelink

\$332 installed

The Home Link system makes it possible to operate up to three remote controlled home appliances (garage door, home alarm system etc.) via a module which is integrated in the sun visor.

The Home link sender learns the codes for the different remote control appliances through a simple learning process. The system is compatible with most products for access control available on the market.

Navigation System

\$4461 installed

The navigation system makes it easier to drive when you have a particular destination and are traveling in an unknown area. The system is highly integrated into the car, including a wide screen display at eye level and easily used buttons on the rear of the steering wheel, all of which are intended to avoid distracting the driver when driving.

Rear Park Assist

\$964 installed

Rear parking assistance warns of obstructions behind the car when you reverse, e.g. with parking. The system is activated when reverse gear is selected. The volume of the radio/stereo is lowered and a pulsating "buzzer tone" is heard from the car's rear loudspeakers. The tone starts when the obstruction is about 150 cm away and increases to a continuous tone when it is less than 30 cm away from the rear bumper. The kit comprises four sensors that are mounted almost out of view in the rear bumper, a control module, wiring and a button in the center console. The system can be switched off manually using the button in the center console.

Front Park Assist

\$955 installed

Front parking assistance is an excellent system that warns of obstructions when you have limited space in front of the car. The system is activated when speed is less than 15 km/h. A signal indicates the distance to objects in front of the car. When an object is indicated, the volume of the radio/stereo is lowered and a pulsating "buzzer tone" is heard from the car's front loudspeakers. The tone starts when the obstruction is about 80 cm away and increases to a continuous tone when the distance is approx. 30 cm away from the front bumper. **Rear park assist is also required before installing front parking assistance.**

In order to differentiate between the front and rear systems, different tone frequencies are used and the sound comes from different loudspeakers, front or rear.

The kit comprises four sensors that are mounted almost out of view in the bumper, and wiring. The system can be switched off manually using a switch in the center console.

Front & Rear Park Assist Package \$1925 installed

This is a complete kit that is comprised of both front and rear parking assist.

iPod Adapter

\$468 installed

The Volvo iPod adapter connects your iPod to the audio system in your vehicle. You can listen to all your favorite music through the sound system in your vehicle. You can control up to 9 different play lists pre-chosen by you, simply by using the steering wheel controls or the radio itself. It's that easy The Volvo iPod adapter also charges the iPod when connected and the car is running. The iPod adapter plug mounts conveniently in the armrest compartment. Simply open the armrest lid to access the iPod connector, plug it in, turn it on, and close the armrest. Select the "10 Cd changer" mode, from the radio source button, and you're ready to go. Can not be installed with either the 10 disc Cd changer or the Volvo Digital juke box.

Bluetooth Kit

\$594 installed

Volvo's voice-controlled Hands-free kit with Bluetooth is a smart, simple way to talk on your cellular phone while in the car.

The system is simple to use. Just press the blue button and the Volvo Hands-free System will obey your orders. The system has perfect sound reproduction with interference reduction, generating an optimal call experience. The sound from the car's audio and navigation systems is lowered automatically during incoming and outgoing calls.

The voice-controlled menu can be used to:

- make calls via "voice marks" that can be stored in the system
- make calls via speed dial numbers
- request system help
- call someone by speaking the phone number

The system has voice recognition in several languages including English (US and UK), French (EU), Spanish, Italian and German.

*Sirius Satellite Radio \$817 installed with sat prep
\$885 installed without*

Thanks to three satellites orbiting above the American continent, together with ground transmitters, you can listen to digital radio irrespective of where you are. It does not matter which model of audio system you have when connecting to Sirius.

Sirius satellite radio offers you a unique and first-class range of music, sport and news around the clock - fully digital. Sirius gives you more than 100 channels to choose from, with over 60 channels of music without commercial breaks, and more than 40 channels of sport and news in fully digital sound.
